

Mahdi Rajabi

Python Backend Engineer | Django , Linux , Databases

[Email](#) | [LinkedIn](#) | [GitHub](#) | +98 921 074 0084 | Hamedan , Iran

PROFESSIONAL SUMMARY

Python Backend Engineer with a strong foundation in building scalable web applications using Django and Flask. Proficient in designing RESTful APIs, working with relational databases like PostgreSQL, and implementing task queuing with Redis and Celery. Experienced in containerizing applications with Docker and automating workflows. A collaborative team player with a deep understanding of software architecture, a commitment to writing clean and maintainable code, and a constant drive for learning and improving.

TECHNICAL SKILLS

Programming Languages: Python

Frameworks & Tools: Django, Flask, Redis, Celery, PostgreSQL, Docker, Git, GitHub

Concepts & Soft Skills: RESTful API Design, Linux, Networking, Cybersecurity,

Team Collaboration, Problem Solving, Continuous Learning

PROJECTS

Elevator Corporate Portal

Django, PostgreSQL, Redis, Celery, Docker

Corporate platform with role-based admin panel, live chat, and ticketing system.

Telegram RSS News Bot

Python, Flask, Redis, Docker, Telegram API

RSS news fetcher that summarizes and publishes updates to Telegram channels.

Flask RSS News Aggregator

Python, Flask, Redis, Docker

Web-based RSS aggregator displaying summarized news with source references.

EDUCATION

B.Sc. in Computer Engineering (In Progress)

Islamic Azad University

2023 – Present

LANGUAGES

Persian: Native

English: Intermediate (B1-B2)
